

# TREATMENT WALLET CARD

There may be times when you need to see a new healthcare provider, such as in an emergency or at a specialist appointment. If you or your loved one are hospitalized, be sure to show them this card. It lets healthcare providers know that you or your loved one are receiving AUCATZYL, a prescribed treatment, and includes important information your care team should be aware of.

**Instructions:** Print and cut out this card. Ask your healthcare provider to help you add the necessary contact information. Keep it in your wallet, bag, or appointment book so it is easy to share with your care team.
